## DETAILED ACTION

### *Drawings*

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: #57 (as per page 9, line 12), #62 (as per page 9, line 23) and #63 (as per page 10, line 1). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Driesen et al (USP 5,652,990). The patent to Driesen discloses a bristle carrier (38) and a plurality of tufts arranged in three distinct groups (see especially figs 3 and 4) including a first group disposed in an outer row (70), a second group disposed in a middle row (72) and a third group (the two tufts in the center which are within the middle row) disposed in an inner row. Absent a recitation of a structural difference or distinction between the three groups, the mere recitation of the intended function thereof is not sufficient to define over the prior art.

Art Unit: 1744

4. Claims 1-3 and 5 are rejected under 35 U.S.C. 102(a) as being anticipated by Masterman et al (USP 6,058,541). The patent to Masterman discloses (see especially fig 7) a bristle carrier (68) having a plurality of tufts of bristles arranged in three distinct groups including an outer row, a middle row and an inner row (see fig 7). As mentioned above, the mere difference in the intended function of the three groups, absent a structural distinction therebetween, fails to define over the prior art.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Masterman et al (USP 6,058,541). The patent to Masterman discloses the invention substantially as claimed with the exception of the embossment. The provision of various distal end bristle shapes is well known in the art and that one of ordinary skill would deem it obvious to modify the distal ends of the bristles of Masterman depending on the desired abrasive effect on the teeth and gums.

***Allowable Subject Matter***

7. Claims 6-49 are allowed.
